.....

You Greet your Family and Everyone goes their Separate Ways for the Day

On your way to Work

You meet up with Co-Workers

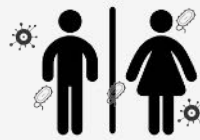

You send a few Emails, etc

You Enjoy a Wonderful Lunch

You use Money to Buy a Quick Lunch

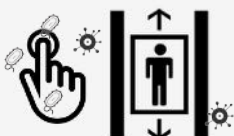

You take a Quick Restroom Break

Time for a Meeting

You Make a Few Phone Calls

Quick Pop in an Elevator

Time for Another Meeting

You Finalize Your Tasks of the Day

You Greet your Family

You Pop in to Your Local Store

Your Day is Done and You're on your Way Home

You Greet your Co-Workers

Everyone has some Dinner and Discusses their Day

Time to Enjoy the Fruits of your Day's Labor

Time to Cleanup before Bed

Off to Bed to Repeat it all again Tomorrow

It is clear to see from the Cycle of Normal Day-to-Day Activities that chances for cross infection is everywhere. Germs can be found everywhere, on keyboards, phones, toys, a car's steering wheel, conference rooms, etc.
So how do germs travel everywhere?...let's take a look.

The Journey of the Germ

Germs are Invisible to the Naked Eye

You touch various objects and surfaces in your normal day-to-day activities as shown in the Cycle

An example of a surface that you might be touching. It is infested with all types of different germs. If you don't wash your hands, you will transfer these germs to other objects, people and surfaces

So What Can You Do?

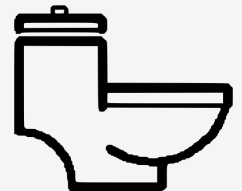

Wash Your Hands Regularly

Disinfect Surface Areas Daily

Use Alcohol-Based Sanitizers Daily

Ensure that the Toilet Lid is Closed Before Flushing

Get **Sprinkle Spray** to Service your Facility Weekly

Follow These Steps to help Limit the Effects of Cross Infection at Your Facility.
